

Now! One pair of snips to do all cutting jobs.

FOR the practical sheet metal worker—for the workman who knows the value of good tools—of time and labor saving tools in his daily job, we've designed a new kind of tinsmith snips that deliver 100% service on all classes and kinds of metal cutting jobs.

Advance Snips are all-purpose snips. With Advance Snips you can cut straight lines, curves, angles, circles—all with one pair of snips and all in one, single, time-saving operation. You save time. No need to change snips in cutting a many-shaped pattern. When you start on a pattern you cut right through.

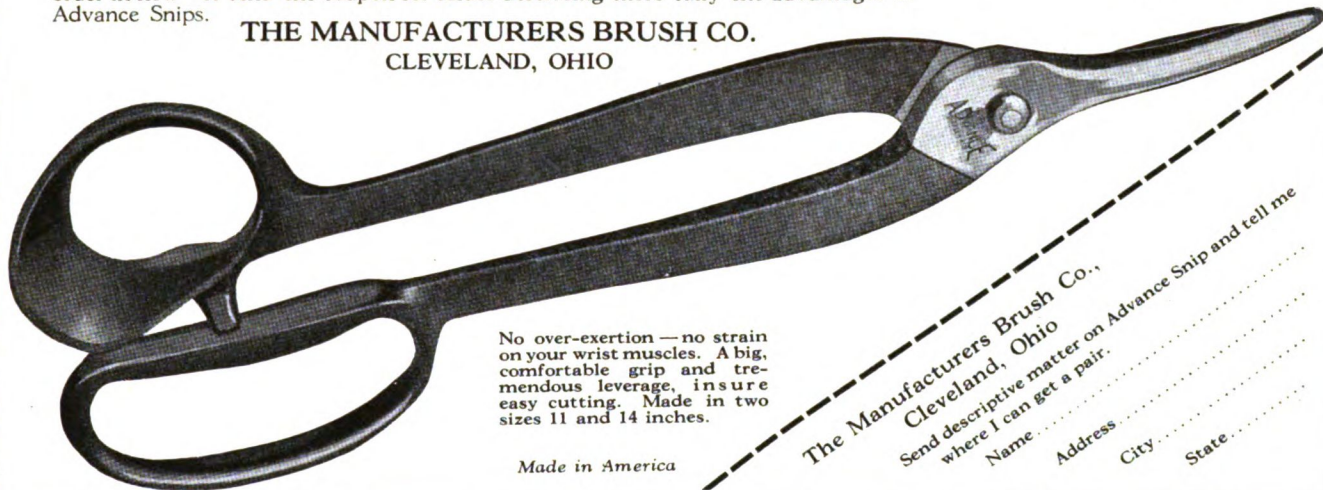

The answer to the all-purpose ability of Advance Snips is found in their blades—ingeniously fashioned and with a cutting edge of tough, service-giving Swedish tool steel. They cut clean through the toughest piece of stock with ease and accuracy.

Tinsmith jobbers are being stocked as fast as we can make deliveries. Get your order in now—or send the coupon for folder describing more fully the advantages of Advance Snips.

THE MANUFACTURERS BRUSH CO.
CLEVELAND, OHIO

The letter "S"—a real cutting job. Grip a pair of Advance Snips and see how they do the work.

No over-exertion — no strain on your wrist muscles. A big, comfortable grip and tremendous leverage, insure easy cutting. Made in two sizes 11 and 14 inches.

Cleveland, Ohio

Advance Snips are made in two sizes: 11 inches and 14 inches; of high quality drop forged steel; cutting edges of tough, service-giving Swedish tool steel. Made in America by American workmen.

One pair of snips to do ALL cutting jobs!

Save time, save energy and do neater, cleaner work with Advance—the all-purpose snips

Here's a pair of snips that are 100% practical—that cut straight, cut circles, angles, curves or scrolls, all in one single cutting operation without removing snips from metal.

Advance are all purpose snips. Cut any pattern no matter how difficult. Big leverage gives you tremendous cutting power on toughest stock. You save time. You save energy.

Ingeniously shaped, powerful blades cut any shape and cut quicker. Razor-keen edges cut a neater, cleaner job. No curled or fuzzy edges—to try your temper and waste metal.

Advance Snips are taking the trade by storm. Just what practical craftsmen have longed for.

Order your pair now—through your regular jobber or hardware dealer. Or send your order to us now and we'll fill from your nearest source of supply.
